

Easy Set-up & Control

Zareba Product Overview

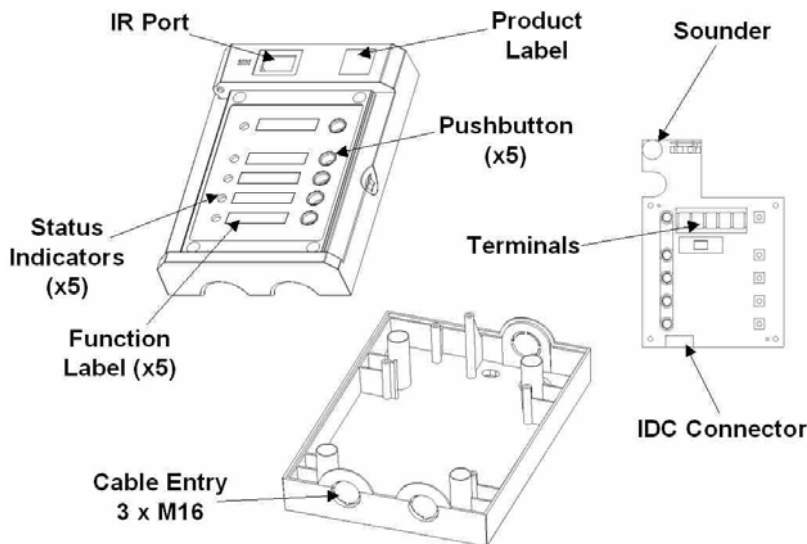

- **Remote set up and control**
 - Every system sold includes a ZHC2 Remote Control
- **Total control over detector operation**
 - Address, gas type, range, zero, span
 - Alarm configuration (instantaneous or time weighted)
 - Local relay and audible alarm operation
- **Makes system configuration quick & easy**
 - Remembers all detector configurations
 - Allows user to 'transfer' all information to controller
 - No need to enter the same information twice
- **Simplifies detector replacement**
 - Read set up from detector
 - Replace detector
 - Send set up back to detector

Option	Function
SetGasConcen	View gas reading
SetDetectorInfo	Configure the detector, e.g. address, relay settings, etc.
TransferInfo	Transfer information, for use when connected to a controller
Calibration	Calibrate the detector
AdjustZero	Set detector zero

Metro Remote Override Box

Zareba Product Overview

- **Enables override of relay operation**
 - 4 digital inputs + 'reset' signal
 - May be integrated into relay logic at controller
- **Reduced installation costs of system**
 - Allows override of relay logic from remote location without need to wire all relays to that location thereby reducing installed cost
- **Wired & configured 'like' a detector**
 - AC operated, local audible and visual alarms
 - ZHC2 Remote Control for configuration
- **May be integrated with 3rd party panel**
 - Connector included for 'remote pushbutton'
 - E.g. Integrate with fire system mimic panel
 - Used by Fire Brigade to control ventilation
